

Remote

Menambahkan Remote Baru

1. Tambahkan Remote Baru:

```
git remote add <remote_name> <remote_url>
```

contoh:

```
LENOVO@Rhnn-25JP MINGW64 /d/dev  
$ git remote add origin https://github.com/xi-rpl-1/Best-Practices-Github.git|
```

2. Verifikasi Remote atau Cek Remote:

```
git remote -v
```

Mengubah URL Remote

1. Mengubah URL:

```
git remote set-url <remote_name> <new_remote_url>
```

contoh:

```
LENOVO@Rhnn-25JP MINGW64 /d/dev  
$ git remote set-url origin https://github.com/xi-rpl-1/Best-Practices-Github.git|
```

Push

Mengirim Perubahan ke Remote

1. Staging Perubahan:

```
git add .
```

2. Commit Perubahan:

```
git commit -m "Deskripsi perubahan"
```

3. Push ke Remote:

```
git push origin main
```

Pull

Mengambil Perubahan dari Remote

1. Pull dari Remote:

```
git pull origin main
```
